IRC Networks

- WEBIRC - Handle your users hostnames / IP addresses properly.
- Stats - See how many users are connecting to your network in real-time.
- Servers - Control which servers kiwi users can connect to. It's your network.

Website Widgets

Embed an IRC client widget into your website for an instant, free live chat.

The web widget gives you access to a large number of supported networks without any in-depth setting up. No downloads or plugins required meaning your users can start engaging in your community easily.

Recent Updates

[Kiwi IRC gets sponsored by PrivateInternetAccess](#)

by **PAWNSALAD** on **JULY 12, 2017**

It is with great pleasure that I can now announce that kiwiirc.com and its development is now sponsored by Private Internet Access.

[Privacy changes to unregistered networks](#)

by **PAWNSALAD** on **JANUARY 24, 2016**

As of 29th January, the default way connections are made to unregistered IRC networks will be changing.

Kiwi IRC has always been heavily privacy focused from day one:

- We do not and have never divulged users information when asked
- We do not store users information for longer than needed

- We do not pass users connection information to IRC networks unless specifically requested to do so
