Dictionary Extensions Impress Writer

Description

Quick Translator is a clean, lightweight, and user-friendly extension for LibreOffice that allows you to quickly translate selected text without leaving your document.

Designed for seamless productivity across LibreOffice Writer, Calc, and Impress, Quick Translator adds a dedicated **"Translate"** button to your toolbar. When clicked, it automatically captures your selected text and opens an independent, movable floating dialog for fast multi-language translation.

Key Features:

- **Seamless Workflow:** Select text in your document, cell, or presentation and click "Translate" to translate instantly.
- **Independent Floating Dialog:** The translation window is freely movable, allowing you to read or edit your document while keeping the translation visible.
- **Auto-Language Detection:** Automatically detects the source language of your selected text.
- **Over 15 Popular Languages:** Fast translation support for English, Italian, Spanish, French, German, Portuguese, Russian, Chinese, Japanese, Korean, Arabic, and more.
- **Bidirectional Language Swap:** Easily switch source and target languages with a single click.
- **Zero Configuration:** Ready to use immediately upon installation with no setup needed.

Compatibility:

Works on Windows, macOS, and Linux with LibreOffice 6.x, 7.x, 24.x, and newer.

Title / Name: Quick Translator

Category: Languages and Linguistics, Productivity Tools

Compatibility: LibreOffice 6.x, 7.x, 24.x, 25.x (All Platforms: Windows, macOS, Linux)

License: GPL-3.0

Please write in the comments for any bugs or problems.

☆☆☆☆☆

I have used it for about an hour for Spanish to English and am very satisfied. On the Mac, you can configure a keyboard shortcut and dispense with toolbar placement. Keeps the interface clean. Dont forget to label the menu command "Quick Translator..." precisely. With the space and the ...

I'm glad it's helpful. Simple and clean, I agree.
I'll try to add keyboard shortcuts in the next version.
Thanks again for the suggestions. :-)

★★★★☆

Description states this extension has over 15 languages but in reality only few languages listed and not alphabetically ordered. The only option, to modify quick_translator.py script adding missing language as well as correcting other lines in script. Hopefully it will be fixed to show all languages and allow to save selected target language permanently.

Thanks for the feedback.
Your help is very important to me. If you'd like, you can collaborate directly on the small project's Github page.
The changes will be made in the next update.
Thank you. :-)
