I'm not using Jan with Jan-V1-4B, drop me a line if you are doing and install it now! It's a real Open gem. BTW: yes, I'm an AC Milan fan.

Jan-V1 is seriously good, Apple should consider using this to power Siri. You just don't need expensive closed models anymore for many tasks, open models have come a long way.

Anes Valentic
@Matrix_Memories
Jan is an amazing tool that is open source and you can deploy locally. If you haven't already be sure to do so. Thanks goes to the @jandotai team!
