Suffixes are optional norloge data.

They MUST be appended in the following order:

1. indice suffix
2. bouchot suffix

Indice suffix

Indice is a disambiguation hint if two or more posts share the same datetime norloge.

Assuming that:

- post are chronologically ordered from lastest to newest.
- there is no more than 9 posts sharing the same norloge.

An indice is a number from 1 to 9 designing the referenced post.

Ascii indice

Indice MAY be written using Ascii characters prefixed by a CIRCUMFLEX ACCENT

12:42:10 Dave : Hello!

12:42:10 Dave : Who are you?

12:42:20 Newton: 12:42:10^1 Hi!

12:42:21 Newton: 12:42:10^2 I am Newton.

Unicode indice

Indice MAY be written using Unicode characters: 1 2 3 4 5 6 7 8 9

12:42:10 Dave : Hello!

12:42:10 Dave : Who are you?

12:42:20 Newton: 12:42:10¹ Hi!

12:42:21 Newton: 12:42:10² I am Newton.

Bouchot suffix

Bouchot suffix MUST be used to reference a post on another bouchot instance.

Bouchot suffix MAY be used to reference a post on same bouchot instance.

Bouchot instance alias is written after a COMMERCIAL AT:

12:42:10 Dave : Did you see this post 11:40:20@d1fp ?
