## About this item

- 4 PC SHARE MULTIPLE DEVICES The EKL 4 in 4 out USB switch supports 4 computers sharing 4 USB devices such as keyboards, mice, printers, headphones and USB cameras. Switch freely between your work computer and personal computer and increase your work efficiency.
- Support USB Audio Output The USB 3.0 switch has two 1/8" audio jacks, can connect with microphones and headphones. Compatible with 3 and 4 poles, no conversion head required. CTA compatible headphone interface.
- Transfer Files in Seconds | Plug & Play - With 4 USB 3.0 ports, the USB 3.0 switch supports data transfer up to 5Gbps and is backward compatible with USB 2.0. Driverless for Windows 7/10/11 and Mac OS, Linux and Chrome OS. Simple Plug and Play.
- USB-C Power Supply The USB switch is designed with optional power supply for high-power devices such as hard drives, headsets and other USB devices to work more stably, and the cable is included.
- Three Switching Modes The USB switch has three switching modes: desktop control, button and RS232, device switches freely as you like. You can put the USB switch under the desk and use the desktop control to save space. Or use the RS232 code to change. Note: Do not use the USB port to power the speaker, otherwise it may lead to an unstable connection.

**"RS232 Magic: My Computer Now Has a Remote Control"**

Reviewed in Canada on 17 June 2025

Size Name: USB3.0 with remote and RS232 cable Verified Purchase

bought this switch because I wanted RS232 remote capability—because apparently, my tech setup needed to feel like a spaceship cockpit.

It's working great with my custom Python code that switches monitors via DDC and USB devices via the EKL. Basically, I wrote a script so now my computers can talk to each other like they're at a party where everyone knows how to share the snacks.

What Happens:

Press a button on my keyboard — monitor changes — USB device follows — all while sipping coffee

My Python code is smarter than most humans I know (and it doesn't complain about cable management)

RS232 remote control means I can switch devices without leaving my chair. Because walking 5 feet to the back of the desk was so much fun before.
