THEY LAID US OFF. WE'RE REBUILDING THEIR SAAS.

Occupysaas is a protest movement written in code. Laid off engineers, armed with AI coding assistants and information, are building **clean-room, open-source, drop-in replacements** for the platforms that won our own industry back from us — one seat at a time.

[SEE THE FIRST RELEASES] [JOIN THE OCCUPATION]

Now: Zendesk, v1.0, in v.1 qa_ext

SAY WITH

YOU WILL OWN EVERYTHING AND BE HAPPY!

Your code, your data, your software. Boring, predictable, and owned in-house, and nobody who can switch it off but you.

Proposed categories are open for discussion, not commitments. Names of existing products are used only to describe compatibility.

2026

OCCUPY EVERYTHING.

You don't need permission, a badge or a manager. You need a laptop and an afternoon.

[JOIN ON GITHUB] [JOIN ON DISCORD]

[FUND THE OCCUPATION] [PROPOSE A TARGET]

Why two fundraisers? Some people won't use one platform or the other. We'd rather take your support wherever you're comfortable giving it.

IS THIS LEGAL?

ARE YOU AFFILIATED WITH AUTH0, OKTA OR SALESFORCE?

CAN FORMER EMPLOYEES OF THOSE COMPANIES CONTRIBUTE?

WHY USE AI TO BUILD IT? +

WHY GO? +

WHY NOT RUST? +

IS IT PRODUCTION-READY? +

WHAT DOES IT COST? +

OCCUPY SAAS

A movement for the lash off developers of the SaaS industry. Occupy SaaS is a movement of the software that runs everything.

PROJECTS

- DevAuthy
- SalesCompel
- All repositories

PROGRAM

- Clean slash method
- Occupation map
