standard > tribune

tribune

A tribune is web chat system used by moules.

It has a least a bouchot:

- an XML backend and/or TSV backend accessible through HTTP request.
- an HTTP POST support for posting messages.

Most alive tribunes add features:

- integrated coincoin
- file upload
- authentification

Miscellaneous

Character encoding

Every strings in every tribunes and subsystems MUST be valid UTF-8.

Bouchot SHOULD be prepared to handle invalid UTF-8 strings.

Sanitization

Bouchot and Coincoin MUST be prepared invalid tribune data.

They MUST sanitize their inputs or die trying.
